

RM 2,000-3,000 / month

Remote in Malaysia

Final-year / 2026 Graduates

Company

Nocoly is a Hong Kong-headquartered enterprise software company focused on no-code / low-code Hyper Application Platform (HAP). We help enterprises build business applications, automate workflows, integrate systems, and improve digital operations.

Role Overview

We are looking for an Implementation Engineer Intern in Malaysia to support partner enablement, customer projects, product demos, and application implementation on Nocoly HAP. This internship is suitable for students interested in enterprise software, SaaS, low-code and solution implementation.

Key Responsibilities

- Support partners in building applications on Nocoly HAP
- Assist with configuration, troubleshooting and solution guidance
- Support requirements gathering, configuration, and testing for selected customer projects
- Help prepare demos, use cases and solution scenarios
- Work with APIs, databases and integrations when required

Requirements

- Final-year student or 2026 graduate
- Computer Science, Information Systems, Software Engineering, IT, Data Science, AI or related fields
- Strong logical thinking and problem-solving ability
- Interest in enterprise software, SaaS, no-code / low-code and system implementation
- Good written and spoken English; Mandarin or Bahasa Malaysia is a plus

Internship Details

Location	Remote in Malaysia; KL / Selangor preferred
Allowance	RM 2,000-3,000 per month
Duration	3-6 months; flexible based on university requirements
Start Date	2026 intake / flexible
Mode	Remote Internship Arrangement, subject to university requirements

What You Will Gain

- Enterprise SaaS and no-code / low-code implementation exposure
- Hands-on partner and customer project experience
- Practical experience in implementation, testing and solution support
- Mentorship from implementation and solution professionals
- Strong performers may be considered for future full-time opportunities

Eligibility & Target Students

Eligibility

Applicants should be legally eligible to undertake internship or remote work in Malaysia. Visa sponsorship is not provided.

Target Students

Computer Science, Information Systems, Software Engineering, IT, Data Science, AI, Software Development or related fields.
